**College of Education (B. Ed), Vita.**

**Energy Policy of Institution**

1. If there is wastage of electricity and water in campus, bring it to the notice of the responsible person.
2. If there is wastage and misuse of electricity, do it yourself. For example, it will be everyone's responsibility to switch off fans, bulbs if they are running unnecessarily.
3. Getting the electricity and water supply systems inspected by experts once a year and maintained as per their instructions.
4. Fans and classroom lights should be used only when natural light and wind are not sufficient.
5. To create awareness among students about proper use of energy and prevent misuse of energy through various programmes.
6. In future increase the use of ecofriendly energy sources.
